

# SAFE-STRUCT RULES

## SIMPLE BUT EFFECTIVE RULES TO MAKE YOU AND THE WORKPLACE SAFE

Australian Construction Group has implemented 10 Safe-Struct Rules that have been identified as 'life saving' based upon the history of significant incidents within the construction industry. These rules have been implemented to keep personnel safe and the workplace a safe place of work.

Position yourself in a safe zone in relation to moving equipment

Verify isolations on plant & equipment, tagging and testing

Work at heights with adequate fall protection

Obtain authorization before overriding or disabling safety critical equipment

Prevent dropped objects

Only operate plant and mobile equipment licenced and competent to operate

Obtain authorization before entering a confined space

Never use a handheld mobile phone or exceed speed limits whilst driving

Never position yourself under a suspended load

Never attend work under the influence of drugs and alcohol

A breach or non-compliance of any Safe-Struct Rule is unacceptable and shall be investigated with consequences including disciplinary action and/or termination of employment.
